LOGICLIBRARY'S BRENT CARLSON NAMED TO THE '2005 INFOWORLD CTO 25'

Carlson Listed Among Industry's Most Influential CTOs Alongside Top Technologists from IBM, Motorola, Juniper Networks, AT&T and the United States Postal Service

PITTSBURGH—April 12, 2005—LogicLibrary®, the leading provider of software development asset management tools, today announced that co-founder Brent Carlson has been named as one of the Top 25 CTOs for 2005 by InfoWorld Media Group. This award honors IT executives who have demonstrated exceptional innovation and leadership within their organization as well as in the industry. The award was announced in the April 11 issue of InfoWorld and is available online at <http://www.infoworld.com/2701>.

This is the second consecutive year that Carlson has been recognized in this prestigious issue. Last year, he was selected as a "CTO to Watch." Carlson drives the development and delivery of LogicLibrary's market-leading products, including the Logidex software development asset management solution. Logidex allows companies to manage, reuse, govern and secure software assets for application development, integration and service-oriented architecture (SOA) projects. Logidex provides a governance platform for controlling the production, distribution and consumption of services throughout large organizations.

"Technology leadership requires technology vision and expertise," said Steve Fox, *InfoWorld* editor in chief. "This year's CTO 25 award winners continue to utilize cutting edge technologies to improve their businesses."

In honoring Carlson, *InfoWorld* wrote, "Back in 2000, when software reuse was widely dismissed as a nice but impractical idea, Brent Carlson had the vision to co-found a company devoted to the concept. LogicLibrary and its product Logidex help enterprises identify and understand the software development assets they already have. This means locating and making sense of thousands of applications, components, database tables, design patterns, application frameworks, and other dispersed application-development building blocks so that the right ones can be leveraged effectively. Logidex also provides tools for governing the production and consumption of those assets and delivering them to the developer inside an integrated development environment."

"Brent Carlson is most deserving of this exceptional honor bestowed by the editors of *InfoWorld*," said Greg Coticchia, CEO of LogicLibrary. "Brent's expertise, vision and boldness are inspiring. Although, as he is the first to point out, this kind of individual recognition is also a reflection of the creativity and

commitment of the entire LogicLibrary team. The innovative spirit at LogicLibrary, which Brent fosters, has produced unique solutions that help customers achieve both technology and business goals.”

Previous to founding LogicLibrary, Carlson spent 17 years at IBM, where he was well known for his role as lead architect on the WebSphere Business Components project and his numerous leadership positions on the “IBM SanFrancisco Project,” a consortium of more than 100 companies. Brent is a regular speaker at industry trade events and a co-author of two popular software development books—*SanFrancisco Design Patterns: Blueprints for Business Software* and *Framework Process Patterns: Lessons Learned Developing Application Frameworks*. Carlson holds 16 patents for his work, with eight more currently under evaluation.

About IDG

InfoWorld Media Group is a division of IDG, the world's leading technology media, research, and event company. IDG publishes more than 300 magazines and newspapers and offers online users the largest network of technology-specific sites around the world through IDG.net (www.idg.net), which comprises more than 300 targeted Web sites in 70 countries. IDG is also a leading producer of 168 computer-related expositions worldwide and provides IT market analysis through 51 offices in 43 countries worldwide. Company information is available at <http://www.idg.com>.

About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse software development assets (SDAs). The company’s patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives. Additionally, LogicLibrary’s Logiscan provides powerful, easy-to-use code-scanning technology that helps architects; developers and IT professionals ensure the highest levels of security throughout the software development lifecycle.

LogicLibrary has been positioned in the “Leader” quadrant in Gartner Inc.’s Magic Quadrant for Metadata Repositories, 2004* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past two years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with additional offices in Rochester, MN and Sunnyvale, CA. For more information, visit <http://www.logiclibrary.com>.
