IBM GLOBAL SERVICES AGREES TO RESELL LOGICLIBRARY'S SOA GOVERNANCE SOLUTION

PITTSBURGH—October 4, 2006—LogicLibrary®, a leader in design-time SOA governance and software reuse, today announced it has completed a world-wide reseller agreement with IBM Global Services for their Enterprise Application Modernization and Management practice. IBM Global Services will be able to resell and provide services for LogicLibrary's flagship product, Logidex™. Additionally, LogicLibrary will provide training and support to IBM's sales and consulting teams as they implement service-oriented architecture (SOA) projects that include Logidex software.

In order to achieve the business benefits of SOA, organizations need IT architectures that provide collaboration, flexibility and support for the business processes required to meet today's on-demand objectives. Prominent organizations such as Dun & Bradstreet and Highmark use Logidex in conjunction with solutions from the IBM Software Group, such as IBM Rational and IBM WebSphere, to create flexible IT environments where information is connected across the enterprise. This collaborative approach to business and IT decision making improves quality of service, mitigates business risk and improves time to market.

“By making it possible for us to maximize our reuse of software components, Logidex helps Highmark realize greater efficiencies,” said Mike Kronnenwetter, vice president, technology management at Highmark. “In addition to generating these efficiencies related to development and maintenance, Logidex also fits well within our enterprise architecture and will serve Highmark's business needs for years to come.

“This agreement demonstrates IBM's continued commitment to offer our customers the widest possible options for SOA Governance solutions” said Michael Liebow, vice president Web services and SOA, IBM Global Service. “The Logidex design-time governance solution will complement IBM's existing WebSphere and Rational SOA Development and Governance offerings to help customers build, transform and manage SOA systems.”

“This reseller agreement deepens LogicLibrary's existing long and productive relationship with IBM,” said Don Imhoff, president of LogicLibrary. “SOAs make it possible for organizations to easily reuse and combine business processes and services. But making it easy to access, reuse and combine services also requires governance that begins at design-time and continues throughout the lifecycle of the service. IBM's agreement to resell Logidex is a significant achievement for LogicLibrary and fills the market need for end-to-end-SOA governance.”

This agreement is the latest in an on-going partnership between IBM and LogicLibrary. Past highlights include:

Logidex helps IBM catalog and manage the reusability of its software assets. Through software validation in the Ready for IBM Rational Software program, Logidex works seamlessly with key

products in the IBM Software Development Platform, including IBM Rational Application Developer, IBM Rational Software Architect and IBM Rational ClearCase.

LogicLibrary offers strong support for IBM's SOA Governance initiatives and will support the IBM WebSphere Service Registry and Repository when it becomes available later this year.

IBM selected LogicLibrary to be part of IBM's Express portfolio, giving independent software vendors (ISVs) access to the Logidex online component catalog and search engine. LogicLibrary joined IBM's Web services on WebSphere (WoW) advisory council in 2002. LogicLibrary is an IBM Advanced PartnerWorld Partner.

"From its inception, LogicLibrary pioneered the space of metadata management, and offers one of the most comprehensive solutions for SOA metadata management and governance on the market," said Ronald Schmelzer, senior analyst, ZapThink LLC. "The company has grown interest in its Logidex product beyond North America and Europe, into Asia, the Middle East, and Latin America, and as such, IBM Global Services will give LogicLibrary the ability to provide comprehensive SOA governance solutions to customers around the world, presenting a significant opportunity and achievement for LogicLibrary and its customers."

LogicLibrary has reached a new level of market awareness and success in 2006. Highlights thus far include a 206 percent year-over-year growth rate, impressive customer wins, new integration partnerships and widespread industry validation. Founded in 2000, LogicLibrary has consistently set industry standards for helping organizations manage, reuse and govern software development assets.

About Logidex™

Logidex is a design-time repository/registry with configurable governance policies that make it possible for organizations to actively track and manage services from design through deployment. Logidex's unique combination of a repository for services production, a registry for services and artifact consumption, and automated UDDI and ESB publication options provides governance capabilities for the entire SOA lifecycle.

About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse SDAs. The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner Inc.'s 2H05 to 1H06 Magic Quadrant for Metadata Repositories* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized for three consecutive years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse, BEA and Borland. LogicLibrary is headquartered in Pittsburgh, with an additional office in Rochester, MN. For more information, visit <http://www.logiclibrary.com>.
