LOGICLIBRARY AND METAMATRIX ANNOUNCE STRATEGIC PARTNERSHIP

Integrated Solutions to Combine Management of Data and Software Development Assets to Produce More Efficient Application Development for Service-Oriented Architectures

PITTSBURGH—August 8, 2005—LogicLibrary®, the leading provider of software development asset management tools, and MetaMatrix, the market-leader for Enterprise Information Integration (EII) products, today announced a strategic partnership that could re-define the software metadata market. The companies' combined data integration and software development asset (SDA) management solutions will enable joint customers to realize aggressive return-on-investment (ROI) on integration, development and service-oriented architecture (SOA) projects.

LogicLibrary's flagship product Logidex manages software development assets such as components, patterns and Web services, which use a variety of data elements. MetaMatrix solutions provide access to diverse data sources regardless of source or storage format, transforming volumes of complex data into actionable information. The integration of these products will allow a developer or architect to discover a potentially useful asset in Logidex and then bridge over to MetaMatrix to accurately understand how the data elements in that asset are related to the enterprise's architectural needs. This unprecedented ability to simultaneously control both data and software development assets will result in more agile and efficient application development.

"The combined expertise of LogicLibrary and MetaMatrix delivers powerful end-to-end asset discovery and reusability," said Craig Muzilla, Senior VP of Marketing, MetaMatrix. "Combining software development assets with the data they rely on adds significant value for joint customers. They will experience simplified software development, increased flexibility and faster time-to-market."

The integration of Logidex and MetaMatrix products will give application developers support for any data source and type, leading to increased control over an organization's software assets and the ability for joint customers to transform volumes of complex data into actionable information as they embark on their software development and SOA initiatives.

"Combining LogicLibrary's federated metadata approach and SOA library offering with MetaMatrix's superior data integration capabilities gives developers unprecedented control over the reuse and management of development and data assets," said Greg Coticchia, CEO of LogicLibrary. "Reusable components enable rapid development of new applications and are a major benefit of emerging service-oriented architectures. This partnership between LogicLibrary and MetaMatrix will improve efficiency and ROI for business and government organizations."

About MetaMatrix

MetaMatrix is the leading provider of Enterprise Information Integration and Enterprise Metadata Management solutions that make distributed information accessible and manageable, breaking

through traditional barriers of location, structure, semantics, and context. The MetaMatrix technology is embedded by some of the world's largest software companies, and is in use at the world's largest commercial and government organizations. Additional information is available by calling (800) 734-1630 or visit <http://www.metamatrix.com>.

About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse SDAs. The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives. Additionally, LogicLibrary's Logiscan provides powerful, easy-to-use code-scanning technology that helps architects, developers and security professionals ensure the highest levels of security throughout the software development lifecycle.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner Inc.'s 2H05 to 1H06 Magic Quadrant for Metadata Repositories* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past three years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with additional offices in Rochester, MN and Sunnyvale, CA. For more information, visit <http://www.logiclibrary.com>.
