LogicLibrary Receives Extensive Industry Recognition

*Customer Wins, Analyst Praise and Additional Industry Awards Strengthen
LogicLibrary's Position at the Forefront of SOA Governance Market*

PITTSBURGH--July 6, 2005--LogicLibrary(R) has received widespread recognition for its industry leading efforts to make it possible for businesses and government organizations to manage, govern and secure software development assets (SDAs).

In recent months:

-- Forrester Research recognized LogicLibrary as a leader among the new generation of solutions that support enterprise reuse of software development assets. According to the report, "Application Development Asset Management Tools Offer Unique Benefits for Reuse Initiatives", LogicLibrary customers note a number of successes with Logidex. In particular, they cite specific improvements in time-to-market and ease of management communication.

-- LogicLibrary has been positioned in the "Leader" quadrant in Gartner Inc.'s 2H05 to 1H06 Magic Quadrant for Metadata Repositories(a). The Gartner Magic Quadrant positions companies based on their vision and ability to execute that vision.

-- The independent analyst firm CBDI, in its report titled "Software Development Asset Management with LogicLibrary Logidex", highlighted LogicLibrary for its comprehensive approach to simplifying the complex task of component-based development (CBD) and management. Logidex was cited for its model-based, graphical approach to capturing and cataloging SDAs.

-- In a report by Rachel Chalmers, Senior Analyst with The 451 Group, a technology industry analyst company focused on the business of enterprise IT innovation, she commented, "There are software asset repositories on the one hand and code analysis tools on the other, but to our knowledge, LogicLibrary is the only company to offer the combination." *This comment appeared in an independent report, titled "LogicLibrary Complements Homegrown Repository with Static Analysis from BugScan," which was published on June 7 of this year (see Editor's Note below).*

"LogicLibrary has continued its extraordinary winning ways during the first half of 2005," said Greg Coticchia, CEO of LogicLibrary. "Logidex delivers exceptional and measurable ROI and enables customers to produce high quality software that supports

key business objectives. Regardless of the standard of measurement--competitive customer wins, client feedback, analyst recognition or industry awards received-- LogicLibrary remains out front in the market for managing and securing software development assets."

In the first half of 2005, LogicLibrary also received more awards in a variety of categories.

-- Industry leadership--LogicLibrary was named to the annual SD Times 100 for the third consecutive year. Named to the prominent list every year since its inception in 2003, LogicLibrary was recognized for its comprehensive service-oriented architecture (SOA) governance platform and federated repository support.

-- Innovation and vision--Co-founder Brent Carlson was named as one of the Top 25 CTOs for 2005 by InfoWorld Media Group. This award honors IT executives who have demonstrated exceptional innovation and leadership within their organization as well as in the industry.

-- Product excellence--TechTarget's SearchWebServices.com named Logidex 3.5 the Application Development/Deployment "Product of the Year." Logidex beat out products from IBM and Novell to win the prestigious Gold Award.

Logidex's highly-touted Smart Controls(TM) provide unique functionality that makes it possible for organizations to govern the entire production process for reusable components, Web services and other SDAs within an SOA. In addition to Smart Controls, LogicLibrary sets the standard for SDA management solutions with Federated Repositories, UDDI governance, deep integration with the leading development environments and pioneering code scanning technology that helps ensure that only high-quality, secure assets are deployed in an enterprise.

The most widely-used metadata repository for software development assets, Logidex is the only SDA management product to feature tight integration with the industry's major development environments, including Eclipse, IBM WebSphere Studio, IBM Rational Application Developer, Software Modeler and Software Architect, Microsoft Visual Studio .NET, Borland JBuilder and SAP NetWeaver.

Logiscan provides powerful, easy-to-use code-scanning technology that helps architects, developers and IT professionals ensure the highest levels of security throughout the software development lifecycle.

Editor's Note: The 451 Group's report, "LogicLibrary Complements Homegrown Repository with Static Analysis from BugScan," referenced above, is an independently-produced report that was neither sponsored by nor otherwise funded directly by LogicLibrary. About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse SDAs. The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives. Additionally, LogicLibrary's Logiscan provides powerful, easy-to-use code-scanning technology that helps architects, developers and security professionals ensure the highest levels of security throughout the software development lifecycle.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner Inc.'s 2H05 to 1H06 Magic Quadrant for Metadata Repositories* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past three years on the SD Times 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with additional offices in Rochester, MN and Sunnyvale, CA. For more information, visit <http://www.logiclibrary.com>.
