LOGICLIBRARY A FINALIST FOR LANDSLIDE OF EARLY 2004 AWARDS

Widespread Recognition Underscores LogicLibrary's Growing Industry Prominence

PITTSBURGH—April 6, 2004—LogicLibrary™, the leading provider of software asset management tools, has been named a finalist for three prestigious industry awards within the past month. The *eWeek* Excellence Awards, *Software Development* Jolt Awards and *ADT* Innovator Awards have all recognized LogicLibrary's Logidex software asset management solution. Also within the last month, Gartner, Inc. placed LogicLibrary in the "Leader" quadrant of its Magic Quadrant for Metadata Repositories, 2004.*

"Thanks to an exceptional team and an innovative product that quickly delivers real-world value, LogicLibrary has become the 'choice' for companies managing their software assets," said Greg Coticchia, CEO of LogicLibrary. "In addition to the benefits that Logidex delivers, LogicLibrary has a strong partner program and close ties with the leading software companies in the world, including IBM and Microsoft. We are flattered by this industry recognition and committed to providing customers with an unrivaled solution for today's development and service-oriented initiatives."

The *eWeek* Excellence Awards, "the gold standard for recognizing value in enterprise infrastructure innovation," honor products that "demonstrate alignment of technology advances with real-world requirements." In the April 5 issue, *eWeek* editors wrote, "LogicLibrary's flagship product solves the problem of managing code as an asset instead of merely adding to the pile."

In an accompanying column titled, "The Mark of Excellence," *eWeek* Technology Editor Peter Coffee wrote, "Our past choices have been validated in numerous ways. Two of our first-year Excellence Awards winners came from Great Plains Software and Rational Software, which were subsequently acquired by Microsoft and IBM, respectively. Both companies' talents now reinforce their acquirers' expanding platforms: Great Plains, with its skill in delivering big-company IT power on a midsize budget, and Rational, with its core competence in software quality. One of this year's finalists, LogicLibrary's Logidex, has been chosen by IBM to play an important role in delivering component-based solutions. We take pride in identifying the distinctive potential of nascent IT providers, especially when others subsequently place their own bets on those same contenders."

Software Development's Jolt Product Excellence and Productivity Awards distinguish products that have significantly “jolted” their industry “and made the task of creating software faster, easier and more efficient.” LogicLibrary’s Logidex was recognized as a finalist in the category of “Libraries, Frameworks and Components.”

The *ADT* Innovator Awards 2004 recognize “IT development organizations that have undertaken risky projects using innovative technologies and/or processes aimed at solving a pressing business problem.” LogicLibrary customer CNA Insurance, the fourth largest commercial insurer in the United States, was highlighted for its use of Logidex in building a service-oriented architecture (SOA).

Logidex is the industry’s premier collaborative software development asset (SDA) management solution for development, integration and service-oriented architecture projects. Logidex is also the only software asset management product that features tight integration with Eclipse, IBM WebSphere Studio, IBM Rational XDE and Microsoft Visual Studio .NET.

Logidex

Logidex is a collaborative software development asset (SDA) management solution that simplifies the creation, migration and integration of enterprise applications. It represents inherently complex, enterprise application environments in a graphical, intuitive way. Logidex is the only SDA management solution that offers model-based searching, out-of-the-box assets, measurements and metrics—all within .NET and J2EE development environments.

About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse software development assets (SDAs). The company’s patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architectures, Web services and other software development initiatives. LogicLibrary has been positioned in the “Leader” quadrant in Gartner, Inc.’s, Magic Quadrant for Metadata Repositories, 2004 and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Merant. LogicLibrary is recognized on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM/Rational, Eclipse and Borland. For more information, visit www.logiclibrary.com.
