LOGICLIBRARY AND BLUE TITAN FORM STRATEGIC ALLIANCE

SOA Leaders Combine to Provide the Industry's First End-to-End Governance for the Software Development Lifecycle

PITTSBURGH/SAN FRANCISCO—October 13, 2005—LogicLibrary®, the leading provider of software development asset (SDA) management tools, and Blue Titan Software®, the services networking company, today announced a strategic partnership. The companies will integrate their respective products, Logidex and Network Director, to provide customers with effective development-time and run-time governance of services across the service-oriented architecture (SOA) lifecycle. The LogicLibrary – Blue Titan partnership is designed to ensure that SOA initiatives adhere to established policies and align properly with business processes.

“Successful governance can only be achieved through the interoperability of leading SOA solutions,” said LogicLibrary CEO Greg Coticchia. “This partnership with Blue Titan is the latest example of LogicLibrary’s commitment to work closely with today’s top solution providers. LogicLibrary, Blue Titan and other SOA leaders are providing the diverse and rich environment needed to help organizations quickly gain greater business value from their SOAs.”

LogicLibrary’s Logidex, the most widely-used software development metadata repository, enables the distribution and consumption of services across an enterprise by integrating with leading IDEs and by pulling asset information from various systems of record. LogicLibrary is the only company that offers configurable governance policies for the active tracking of service creation and service usage.

“Blue Titan’s collaboration with LogicLibrary will provide customers with a comprehensive approach to SOA governance,” said Frank Martinez, founder and CEO of Blue Titan. “This partnership will help enterprises ensure the success of their SOA deployments by fulfilling the need for governance across the SOA lifecycle.”

Blue Titan's Network Director 3.5 enables a services networking approach to SOA that allows organizations to incrementally deploy SOA as needed and avoid costly accidental architectures that can develop as SOA environments evolve. A Network Director-enabled services network is a loosely coupled network of service providers, service consumers, and Network Director Control Points that intelligently route XML/SOAP traffic, enforce policy, and mediate messages within a heterogeneous environment of protocols and standards. Network Director, and its unparalleled run-time governance capabilities, helps deliver successful SOA solutions that provide flexibility, rapid results, and global-scale to enterprises.

"IT governance is the most critical area of corporate governance in today's competitive enterprise, because IT both requires governance itself and can also provide the necessary tools for corporate governance," said Jason Bloomberg, Senior Analyst, ZapThink LLC. "SOA governance offers effective management of SOA deployments as well as the visibility and control necessary for successful IT and corporate governance, while also increasing the business agility that today's organizations require. The partnership between LogicLibrary and Blue Titan helps organizations to achieve both their governance and business objectives."

About Blue Titan Software, Inc.

Blue Titan Software, the services networking company, helps enterprises deploy and manage their service-oriented architectures by enabling IT to control, share and scale services and applications. Business innovation can therefore be driven across the distributed enterprise in a timely, manageable, and future-ready manner. Founded in 2001 by enterprise software veterans, renowned business technologists and leading investors, Blue Titan Software is headquartered in San Francisco, CA. Fortune 500 customers include; Accredited Home Lenders, British American Tobacco, Citigroup, Yahoo!, and Pfizer. For further information, please visit www.bluetitan.com.

About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse SDAs. The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner Inc.'s 2H05 to 1H06 Magic Quadrant for Metadata Repositories* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past three years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with additional offices in Rochester, MN and Sunnyvale, CA. For more information, visit www.logiclibrary.com.
