## LOGICLIBRARY'S LOGIDEX BEING DELIVERED WITH BORLAND JUILDER® 2006

*Industry's Leading SOA Governance Solution Enables JBuilder 2006 Users to Improve  
Management of Critical Software Development Assets*

**PITTSBURGH—September 26, 2005**—LogicLibrary®, the leading provider of software development asset (SDA) management tools, today announced that Logidex, the most widely used metadata repository for SDAs, is being shipped with Borland's market-leading integrated development environment (IDE) JBuilder® 2006. Logidex helps JBuilder users effectively manage and govern development assets across a worldwide software organization and produce high quality business applications.

JBuilder 2006 is designed to make it possible for customers to manage the complexity associated with program development and deliver standards-based, enterprise-class applications faster than ever. Tight integration between JBuilder and Logidex gives developers and architects the ability to effectively control their organization's software development assets, leading to streamlined projects, powerful cost benefits and improved productivity.

“Borland's real-time, peer-to-peer collaboration features in JBuilder 2006 make it possible for developers to jointly perform a variety of tasks, regardless of their location around the world. This enables faster production of high-quality applications,” said Rob Cheng, director of product marketing, Borland. “Borland Technology Partners such as LogicLibrary offer solutions that complement and add value to our products. We are pleased to make them available to users of JBuilder 2006.”

JBuilder 2006 significantly accelerates the development of Java® applications on leading J2EE™ application servers, including BEA® WebLogic®, IBM® WebSphere®, Sybase® EAServer, JBoss®, and the integrated Borland® Enterprise Server.

“LogicLibrary has long shared Borland's commitment to collaborative development,” said Alan Himler, vice president of product management and marketing at LogicLibrary. “Logidex uniquely provides the capabilities to collaboratively manage and govern SDAs throughout the development lifecycle and, in the process, ensure that development initiatives are always properly aligned with their business objectives. This is extremely

important in today's environment to drive governance and show an aggressive ROI on SOA initiatives.”

## **About LogicLibrary**

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse SDAs. The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives.

LogicLibrary has been positioned in the “Leader” quadrant in Gartner Inc.'s 2H05 to 1H06 Magic Quadrant for Metadata Repositories\* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past three years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with additional offices in Rochester, MN and Sunnyvale, CA. For more information, visit <http://www.logiclibrary.com>.

## **Safe Harbor Statement**

This release contains “forward-looking statements” as defined under the Federal Securities Laws, including the Private Securities Litigation Reform Act of 1995 and is subject to the safe harbors created by such laws. Forward-looking statements may relate to, but are not limited to, the expected benefits to Borland customers from certain features of JBuilder 2006, including the benefits to be derived by the integration of Logidex with JBuilder 2006. Such forward-looking statements are based on current expectations that involve a number of uncertainties and risks that may cause actual events or results to differ materially. Factors that could cause actual events or results to differ materially include, among others, acceptance of Borland products and services including Borland's enterprise software development platform/solution; Borland's ability to successfully deliver on large transactions; Borland's ability to enhance the quality and scalability of Borland products, improve the integration and overall functionality of these products as part of an ALM software development platform and evolve the Borland ALM platform toward the vision of SDO; Borland's ability to establish or enhance strategic alliances; rapid technological and business change that can adversely affect the demand for Borland products and services; and general economic factors and capital market conditions.

These and other risks may be detailed from time to time in Borland periodic reports filed with the Securities and Exchange Commission, including, but not limited to, its latest Annual Report on Form 10-K and its latest Quarterly Report on Form 10-Q, copies of which may be obtained from [www.sec.gov](http://www.sec.gov). Borland is under no obligation to (and expressly disclaims any such obligation to) update or alter its forward-looking statements whether as a result of new information, future events or otherwise.
