LOGICLIBRARY EXPANDS REUSE REPOSITORY SOFTWARE TRADE-UP PROGRAM

Provides F500 Companies in the Midst of Critical Service-Oriented Architecture (SOA) Initiatives an Easy Migration from Computer Associates CAARDS to Award-winning Logidex Reuse Metadata Repository

PITTSBURGH—MARCH 3, 2005—LogicLibrary®, the leading provider of software development asset management tools, today expanded its reuse repository Trade-Up Program to include the Computer Associates' (NYSE: CA) AllFusion Repository for Distributed Systems (CAARDS).

A top IT industry analyst firm recently suggested that customers consider other metadata repository options as Computer Associates focuses its attention away from CAARDS. First introduced last year (http://www.logiclibrary.com/tradeup_pr.htm), the Trade-Up Program enables companies to easily and quickly transition to LogicLibrary's award-winning reuse repository, Logidex™. As part of the program, LogicLibrary will provide a free evaluation of a company's business and technical requirements in order to determine the best way to upgrade and preserve the company's upfront software investment in its current repository.

Logidex is the industry's premier solution for managing, reusing and governing software development assets (SDAs) in development and service-oriented architecture (SOA) projects. It features tight integration with all major development environments, including Eclipse, IBM Rational Application Developer, Rational Software Modeler and Rational Software Architect, Microsoft Visual Studio .NET and SAP NetWeaver Studio. Additionally, LogicLibrary's BugScan application-scanning technology helps architects and developers ensure the highest levels of security at the onset of the design and development process.

“Reuse programs are a vital backbone of the large, strategic SOA initiatives underway at companies worldwide today,” said Greg Coticchia, president and CEO of LogicLibrary. “Our Trade-Up Program enables existing CA customers to easily migrate to the award-winning Logidex platform, preserving their initial SDA investment and minimizing the impact of the changes CA is making in their product line.”

Earlier this year, SearchWebServices.com named Logidex 3.5 the 2004 Application Development/Deployment “Product of the Year.” This continues a landslide of industry and technical praise for Logidex. For a complete list of awards and praise, please visit <http://www.logiclibrary.com/awards.htm>.

Companies that want to take advantage of the LogicLibrary Trade-Up Program should contact LogicLibrary at 412-471-4710, ext. 201 or sales@logiclibrary.com.

About LogicLibrary

LogicLibrary is a leading provider of software and services that make it possible for enterprises to manage and reuse software development assets (SDAs). The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives. Additionally, LogicLibrary's BugScan provides powerful, easy-to-use application-scanning technology that helps architects and developers ensure the highest levels of security at the onset of the design and development process.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner, Inc.'s Magic Quadrant for Metadata Repositories, 2004* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past two years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM Rational, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with additional offices in Rochester, MN and Sunnyvale, CA. For more information, visit www.logiclibrary.com.
