### **CBDI REPORT LAUDS LOGICLIBRARY'S LOGIDEX FOR ITS COMPREHENSIVE APPROACH TO SOA GOVERNANCE**

*LogicLibrary Recognized for its "Rich History of Innovation" in Making Ground-breaking Improvements with Logidex*

**PITTSBURGH—June 29, 2005**—A new report from independent analyst firm CBDI highlights LogicLibrary®, the leading provider of software development asset (SDA) management tools, for its comprehensive approach to simplifying the complex task of component-based development (CBD) and management. In the report *Software Development Asset Management with LogicLibrary Logidex*, CBDI distinguishes LogicLibrary's Logidex for its model-based, graphical approach to capturing and cataloging SDAs. The report appears in the June 2005 edition of *CBDI Journal* and is also available at <http://www.logiclibrary.com>.

"While component- and service-based approaches simplify assembly and consumption, the overall complexity of software delivery and management has increased by an order of magnitude. LogicLibrary demonstrates a comprehensive approach to managing this hugely complex task," said Lawrence Wilkes, principal analyst at CBDI. "We are particularly impressed with the domain modeling and classification capabilities which we believe are essential to support a complex development environment. The new features in Logidex 3.6, such as Smart Controls™, add to its capabilities to discover, document and publish software development assets and enable reuse by improving the governance of the software development lifecycle."

"With the introduction of Smart Controls, LogicLibrary has continued its rich history of innovation in making ground-breaking improvements in how organizations actively manage software development assets in SOAs, Web services and other software development initiatives," said LogicLibrary CEO Greg Coticchia. "We are flattered that a prestigious think-tank of CBDI's caliber has taken notice of our governance platform. Some of the world's leading enterprises are using LogicLibrary to govern and secure their software assets."

CBDI advises on the importance of SDA management to support CBD and SOA. The CBDI report states, "In the federated development environment the separation between service providers and service consumers needs automated asset lifecycle management to ensure that requirements for business and IT governance are met across all participants."

Smart Controls enable an organization to improve governance by defining their asset governance process to better control how, when and which assets are approved.”

The most widely-used metadata repository for SDAs, Logidex is the only SDA management product to feature tight integration with the industry’s major development environments, including Eclipse, IBM WebSphere Studio, IBM Rational Application Developer, Software Modeler and Software Architect, Microsoft Visual Studio .NET, Borland JBuilder and SAP NetWeaver. Logidex’s much-heralded Smart Controls, unique functionality that makes it possible for organizations to govern the entire production process for reusable components, Web services and other SDAs within an SOA.

### **About CBDI**

CBDI is an independent analyst firm and think-tank, providing a focus for the industry on best practice in business software creation, reuse and management. Via their website and monthly journal, CBDI provides a best practice portal for Service Oriented Architecture that is used by thousands of IT managers, architects, and business analysts worldwide. For more information, please visit <http://www.cbdiforum.com>.

### **About LogicLibrary**

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse SDAs. The company’s patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives. Additionally, LogicLibrary’s Logiscan provides powerful, easy-to-use code-scanning technology that helps architects, developers and security professionals ensure the highest levels of security throughout the software development lifecycle.

LogicLibrary has been positioned in the “Leader” quadrant in Gartner Inc.’s Magic Quadrant for Metadata Repositories, 2004\* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past three years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with additional offices in Rochester, MN and Sunnyvale, CA. For more information, visit <http://www.logiclibrary.com>.
