### LOGICLIBRARY CUSTOMERS EXAMINE SOA BEST PRACTICES

*Industry Leaders Such as ING, Liberty Mutual and Wyeth Discuss the Value of Design-time SOA Governance*

**PITTSBURGH—April 06, 2006**—LogicLibrary®, the leader in design-time SOA governance, recently hosted the latest forum in its continuing customer series examining the challenges and successes in building service-oriented architectures (SOAs). The event, held on March 15, featured representatives from Global 1000 companies such as ING, Liberty Mutual and Wyeth.

“LogicLibrary places great value on customer feedback as we continue to advance our industry-leading Logidex design-time repository/registry,” said Greg Coticchia, CEO of LogicLibrary. “Our ‘Customer Care’ sessions are the ideal forum for Logidex users to discuss the many aspects of their SOA initiatives, including design, deployment and governance issues. We are particularly enthusiastic about the way in which LogicLibrary’s customers have taken ownership of the events as a means of exchanging ideas and information. These sessions are an excellent way for LogicLibrary and its customers to benefit from shared experiences.”

LogicLibrary and its customers discussed the many challenges of SOAs, with an emphasis on implementing governance at the onset of SOA initiatives. The representatives shared experiences deploying SOAs and governance initiatives, outlining proven methodologies for governing assets throughout the development lifecycle.

LogicLibrary’s exceptional customer program offers tools and services such as Product Enhancement and Request for Support (PERFS), a Web site where customers can make suggestions on how to improve Logidex and/or ask support questions. PERFS was announced in early 2003 and was the first customer service portal to include a product enhancement request facility; approximately 30-40% of each product release is driven by customers’ PERFS. The PERFS site is accessible via the Logidex Service Center, a support site for Logidex users. The Logidex Service Center ensures that LogicLibrary customers have the products and information necessary to derive the greatest value from their software development and SOA projects by providing access to the latest upgrades and supporting tools, as well as installation documentation. It can be accessed online at <http://support.logiclibrary.com>.

LogicLibrary's flagship product, Logidex, is a design-time repository/registry with configurable governance policies that makes it possible for organizations to actively track and manage services from design throughout the entire deployment. Logidex's unique combination of a repository for services production, a registry for services and artifact consumption, and automated UDDI and ESB publication options provides governance capabilities for the entire SOA lifecycle.

## **About LogicLibrary**

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse SDAs. The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner Inc.'s 2H05 to 1H06 Magic Quadrant for Metadata Repositories\* and engages with Microsoft as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past three years on the SD Times 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse, BEA and Borland. LogicLibrary is headquartered in Pittsburgh, with an additional office in Rochester, MN. For more information, visit <http://www.logiclibrary.com>.
