LOGICLIBRARY TO DISCUSS BEST PRACTICES FOR APPLICATION SECURITY AT ECLIPSEWORLD 2005

*Presentation to Demonstrate Methods for Identifying and Eliminating Vulnerabilities in
Eclipse-based Technologies*

PITTSBURGH—August 22, 2005—LogicLibrary®, the leading provider of software development asset management tools, today announced that Matt Hargett, director of security product development, will be a featured speaker at the EclipseWorld 2005 Conference. Hargett will be discussing the validation of application security in the Eclipse Integrated Development Environment.

Hargett's presentation at the EclipseWorld 2005 Conference will outline white box and black box approaches to application security assessment as well as demonstrate how vulnerabilities can be identified and eliminated in Eclipse-based technologies.

What: "Finding Security Vulnerabilities in Eclipse Applications"
Event: EclipseWorld 2005 Conference
Who: Matt Hargett, director of security product development at LogicLibrary
When: Wednesday, August 31, 2005; 11:00 a.m. EDT
Where: Roosevelt Hotel, New York City, New York

For more information on this and other EclipseWorld presentations, please visit the EclipseWorld 2005 Conference online at: <http://www.eclipseworld.net/>.

Hargett has worked in security quality assurance for more than seven years, doing source code-, runtime- and binary-analysis as well as architecting processes for testing, development, requirements gathering and support at various companies. His experience includes the software engineering of award-winning security products, the publication of several advisories on novel vulnerabilities, and the presentation of various talks at the Software Security Summit, Black Hat, Defcon and elsewhere. His professional interest in making novel vulnerability discovery more accessible and repeatable to the mass market resulted in the creation of Logiscan (formerly BugScan), which was acquired by LogicLibrary in September 2004.

About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse SDAs. The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives.

Additionally, LogicLibrary's Logiscan provides powerful, easy-to-use code-scanning technology that helps architects, developers and security professionals ensure the highest levels of security throughout the software development lifecycle.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner Inc.'s 2H05 to 1H06 Magic Quadrant for Metadata Repositories* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past three years on the SD Times 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with additional offices in Rochester, MN and Sunnyvale, CA. For more information, visit <http://www.logiclibrary.com>.
