LOGICLIBRARY ENDORSES IBM'S SOA GOVERNANCE STRATEGY

Design-time Governance Pioneer Complements IBM WebSphere Service Registry and Repository in Providing Comprehensive Approach for Entire SOA Lifecycle

PITTSBURGH—March 22, 2006—LogicLibrary®, the leader in SOA design-time governance and software reuse, today announced its strong support for the SOA Governance initiatives of IBM, a long-time partner.

The IBM WebSphere® Service Registry and Repository will enable governance capabilities for SOA services and assets. The IBM WebSphere Service Registry and Repository will work with IBM Rational® ClearCase®, which is designed to manage assets during the development lifecycle. LogicLibrary currently provides tight integration for both these solutions.

LogicLibrary currently holds IBM's "Ready for IBM Rational software" validation for IBM Rational ClearCase and IBM Rational® ClearQuest® integration. And, with its broad support for industry standards, including UDDI (Universal Description, Discovery and Integration), Logidex will support IBM WebSphere Service Registry and Repository capability when it becomes available.

"Governance is a multi-faceted challenge for organizations implementing SOA," said Jason Bloomberg, Senior Analyst, ZapThink LLC. "Building services without the proper governance framework in place can lead to redundant capabilities, noncompliance with government regulations, and increased costs of integration. Organizations require the proper processes, policies and visibility throughout the services lifecycle to obtain the desired ROI from their SOA efforts. Partners like LogicLibrary and IBM offer customers a broad set of complementary tools critical to the success of SOA implementation projects."

Logidex also works seamlessly with the Eclipse development environment, as well as key products in the IBM Software Development Platform, including IBM Rational Application Developer, IBM Rational Software Architect and IBM Rational Software Modeler. Logidex is certified as "Ready for Rational" for the IBM Rational Application Developer and ClearCase/ClearQuest and is listed on the IBM Rational Plug-in Central <http://www-128.ibm.com/developerworks/websphere/downloads/plugin/>

“Governance is an essential element for making SOA work. LogicLibrary has been promoting this vision and delivering innovative technology in this space longer than any other solution provider,” said Brent Carlson, vice president of technology for LogicLibrary. “It’s critical that design-time and run-time governance work well together. Logidex is currently integrated with IBM Rational ClearCase/ClearQuest. And, we already have integration in place to support IBM WebSphere Service Registry and Repository. IBM’s SOA Governance strategy is a very complementary fit—and a great opportunity for LogicLibrary.”

About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse SDAs. The company’s patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives.

LogicLibrary has been positioned in the “Leader” quadrant in Gartner Inc.’s 2H05 to 1H06 Magic Quadrant for Metadata Repositories* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past three years on the SD Times 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with an additional office in Rochester, MN. For more information, visit <http://www.logiclibrary.com>.
