LOGICLIBRARY CITED AS A LEADER IN APPLICATION DEVELOPMENT ASSET MANAGEMENT REPORT

*Forrester Research Report Considers Asset Management Tools to be Critical to the Success of
Software Reuse Initiatives*

PITTSBURGH—January 24, 2005—LogicLibrary, the leading provider of software development asset management tools, has been recognized by Forrester Research as a leader among the new generation of solutions that support enterprise reuse of software development assets. The just-released report, *Application Development Asset Management Tools Offer Unique Benefits for Reuse Initiatives*, noted “Customers choose Logidex for three primary types of projects: integration of existing applications using a service-oriented architecture (SOA); migration or revamping of legacy systems; and consolidation of redundant or ineffective systems due to acquisitions, mergers, etc.”

According to the Forrester report, LogicLibrary customers note a number of successes with Logidex. In particular, they cite specific improvements in time-to-market and ease of management communication.

“In every aspect of the business—from product to partners to customers—LogicLibrary has gone to the head of the pack,” said Greg Coticchia, CEO of LogicLibrary. “Logidex is technically superior and easier to use than any comparable product. This has been validated by partners, including IBM and Microsoft, and our customers. In fact, a number of major businesses have turned to LogicLibrary because alternative products can neither scale nor perform nearly as well as Logidex. The world’s leading companies and government organizations are turning to LogicLibrary to effectively manage reuse initiatives, govern emerging SOAs and maximize their software development investments.”

The Forrester report states, “IT delivers value that the business appreciates when investments in reuse contribute to benefits like increased revenue for a particular product or service, improved customer service, or increased profitability due to decreased internal costs.” As an example, Forrester points to LogicLibrary customer CommunityAmerica Credit Union (CACU). “By leveraging application development assets across its acquired businesses, CommunityAmerica is positioning itself to effectively acquire more companies and to easily merge their systems into the company’s business.”

About Logidex

The Logidex SDA Library provides an inventory of assets and their relationships to each other, including technical infrastructure overlays and business processes. Software assets can include Web services, legacy applications, components, XML schema, frameworks, patterns and other key building blocks for application development. Logidex's technology represents complex, enterprise application environments in a graphical, intuitive way and can enable enterprises to efficiently manage and reuse IT assets throughout the complete application lifecycle.

About LogicLibrary

LogicLibrary is a leading provider of software and services that make it possible for enterprises to manage and reuse software development assets (SDAs). The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives. Additionally, LogicLibrary's BugScan provides powerful, easy-to-use application-scanning technology that helps architects and developers ensure the highest levels of security at the onset of the design and development process.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner Inc.'s Magic Quadrant for Metadata Repositories, 2004 and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past two years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM/Rational, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with additional offices in Rochester, MN and Sunnyvale, CA. For more information, visit www.logiclibrary.com.
