LOGICLIBRARY LISTED IN THE LEADER QUADRANT IN LEADING ANALYST FIRM'S MAGIC QUADRANT FOR METADATA REPOSITORIES

*Greatest Revenue Growth Potential Exists for Companies that Support Enterprise Architecture,
Governance, Compliance and Automation of Software Reuse*

PITTSBURGH—July 5, 2005—LogicLibrary®, the leading provider of software development asset (SDA) management tools, today announced that it has been positioned in the “Leader” quadrant in Gartner Inc.’s 2H05 to 1H06 Magic Quadrant for Metadata Repositories*.

The Gartner Magic Quadrant positions companies based on their vision and ability to execute that vision. Additional selection criteria include service and support, functionality and cost. According to the report, authored by Michael Blechar, there has been “a significantly increased need to understand and reuse metadata in support of new service-oriented architectures being implemented using Java 2 Platform, Enterprise Edition (J2EE) and .NET. The relevance and value of metadata repositories has continued to fuel new sales.”

The Magic Quadrant for Metadata Repositories, 2H05-1H06, authored by Michael Blechar, states: “Based on renewed interest in metadata management, the number of new repository purchases has the potential to double that of 2005 by 2010. The greatest revenue growth potential for vendors will be tied to optional complementary repository-based offerings in support of initiatives like enterprise architecture, governance, compliance and automation of software reuse.”

“LogicLibrary has distinguished itself in the market in a variety of ways—with groundbreaking product features such as Smart Controls and Federated Repositories, a fast-growing list of enterprise customers and strong partnerships with industry leaders like IBM and Microsoft,” said Greg Coticchia, CEO of LogicLibrary. “The move to service-oriented architectures has created unprecedented demand for management and reuse capabilities. In addition to Smart Controls, LogicLibrary sets the standard for SDA management solutions with our Federated Repositories, UDDI governance, deep integration with the leading development environments and pioneering code scanning technology that helps ensure that only high-quality, secure assets are deployed in an enterprise.”

LogicLibrary's Logidex is a premier collaborative software development asset management solution that helps enterprises manage, secure, reuse and govern SDAs for use in SOAs and other application development initiatives. Logidex is an SDA management product that features tight integration with the industry's major development environments, including Eclipse, IBM WebSphere Studio, IBM Rational Application Developer, Software Modeler and Software Architect, Microsoft Visual Studio .NET, Borland JBuilder and SAP NetWeaver.

Logiscan provides powerful, easy-to-use code-scanning technology that helps architects, developers and IT professionals ensure the highest levels of security throughout the software development lifecycle.

About the Gartner Magic Quadrant

The Magic Quadrant is copyrighted 2005 by Gartner, Inc. and is reused with permission. The Magic Quadrant is a graphical representation of a marketplace at and for a specific time period. It depicts Gartner's analysis of how certain vendors measure against criteria for that marketplace, as defined by Gartner. Gartner does not endorse any vendor, product or service depicted in the Magic Quadrant, and does not advise technology users to select only those vendors placed in the "Leaders" quadrant. The Magic Quadrant is intended solely as a research tool, and is not meant to be a specific guide to action. Gartner disclaims all warranties, express or implied, with respect to this research, including any warranties of merchantability or fitness for a particular purpose.

About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse software development assets (SDAs). The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives. Additionally, LogicLibrary's Logiscan provides powerful, easy-to-use code-scanning technology that helps architects, developers and IT professionals ensure the highest levels of security throughout the software development lifecycle.

LogicLibrary maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past three years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with additional offices in Rochester, MN and Sunnyvale, CA. For more information, visit <http://www.logiclibrary.com>.
