## LOGICLIBRARY HIGHLIGHTED IN GAVILAN RESEARCH REPORT

*Logidex's Unrivaled Technology for Managing Software Development Assets Emerges as a Key Differentiator in Detailed Metadata Solutions Research*

**PITTSBURGH—April x, 2005**—LogicLibrary®, the leading provider of software development asset management tools, today announced the results of a research report by Gavilan Research Associates LLC, the world's foremost authority on metadata management applications and metadata product research. The study, titled "The 2005 MetaData Solutions Report™," highlights LogicLibrary's strong alliances with leading companies, including IBM and Microsoft, and native support for both .NET and J2EE as key strengths.

Gavilan's MetaData Solutions report finds most metadata providers are focused on data-level solutions. LogicLibrary, on the other hand, concentrates on software development asset (SDA)-level metadata. The combination of its SDA expertise and partnerships with leading metadata management companies, such as Unicorn, enables LogicLibrary to offer organizations unrivaled solutions for IT initiatives.

"In today's environment, where organizations are increasingly looking to maximize their software investments via service-oriented projects, enterprise metadata management has become crucial," said Stu Carty, founder and principal of Gavilan Research. "This report gets to the heart of important functions and features of metadata repositories and showcases LogicLibrary as an innovative leader in the metadata management market. In many ways, such as its continual evolution of products and ability to stay ahead of market expectations, LogicLibrary helps define the market's direction."

Gavilan Research ([www.gavilanresearch.com](http://www.gavilanresearch.com)) helps companies evaluate and select enterprise technology solutions. For The 2005 MetaData Solutions Report, Gavilan researched leading metadata management solutions against a common set of detailed evaluation criteria. This exhaustive effort included compiling answers to over 100 detailed technical research questions and real-world user requirements, comprised of all the typical features, functions, and issues that Global 5000 companies face when organizing a metadata management environment.

"As companies build and deploy service-oriented architectures (SOAs) to compete on a global scale, being able to manage software assets and map them to specific business processes is vital," said Greg Coticchia, CEO of LogicLibrary. "World-leading companies and government organizations are taking advantage of the flexibility and

depth of content that the Logidex metadata repository provides and realizing success with their software development investments today.”

#### **About Gavilan Research Associates**

Gavilan Research Associates (GRA) is an expert consulting firm that helps companies to evaluate and select enterprise technology solutions. GRA is the world’s foremost authority on metadata management applications and vendor/product research. Stu Carty, the President & Founder of GRA, is an accomplished, international metadata solutions expert with 20 years progressive experience in the enterprise software industry. For more information about GRA, please visit [www.gavilanresearch.com](http://www.gavilanresearch.com).

#### **About LogicLibrary**

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse software development assets (SDAs). The company’s patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives. Additionally, LogicLibrary’s Logiscan provides powerful, easy-to-use code-scanning technology that helps architects; developers and IT professionals ensure the highest levels of security throughout the software development lifecycle.

LogicLibrary has been positioned in the “Leader” quadrant in Gartner Inc.’s Magic Quadrant for Metadata Repositories, 2004\* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past two years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with additional offices in Rochester, MN and Sunnyvale, CA. For more information, visit <http://www.logiclibrary.com>.
