ALAN HIMLER NAMED CEO OF LOGICLIBRARY

SOA Design-time Governance Leader also Taps Donald Imhoff as President

PITTSBURGH—September 15, 2006—LogicLibrary®, the leader in design-time service-oriented architecture (SOA) governance and software reuse, today announced the appointment of Alan Himler to the position of chief executive officer (CEO), Donald Imhoff to the office of president and the elevation of Brent Carlson, the Company's co-founder, to chief technology officer (CTO). The executive team will guide LogicLibrary as it focuses on extending its market leadership position in closed-loop SOA governance, expanding its reseller channel opportunities and continuing its impressive growth rate.

“Since its inception in 2000, LogicLibrary has been the software industry's leading pioneer and proponent for design-time management solutions—and now the market is maturing,” said Philip Bronner, member of LogicLibrary's board of directors and a partner at Novak Biddle Venture Partners. “SOA adoption has ignited a tremendous demand for Logidex and the market has a clear need for our closed-loop governance solution. Through their accomplishments and work ethic, Al, Don and Brent have proven to be strong, effective leaders that get results. We are confident they will lead LogicLibrary to even greater successes in the near future.”

Serving most recently as LogicLibrary's vice president of product management and marketing, Himler has been responsible for the strategy and direction behind Logidex, the pioneering SOA design-time governance solution. During his 20 years in the IT industry, Himler has held a variety of leadership positions, including president and COO of Emprise Technologies and director of product management for Legent Corporation, now a part of Computer Associates. Himler received a Bachelor of Arts degree in business from St. Vincent College and a Masters of Business Administration from the Joseph M. Katz Graduate School of Business at the University of Pittsburgh.

As LogicLibrary's vice president of business development and channels, Imhoff has forged key partnerships with the industry's most significant companies, including IBM and Microsoft. He will be responsible for spearheading these channel and sales efforts. Imhoff's experience includes more than 20 years leading marketing teams and running operations at technology companies such as Intraware, Symantec, TruSecure and Legent. Imhoff holds a Bachelor of Science degree in information sciences from the University of Pittsburgh.

Carlson, named one of the Top CTOs of 2005 by *InfoWorld* magazine, is a highly regarded industry expert. He is the co-author of two books, has published numerous articles and is a frequent presenter at industry conferences. In addition to driving the development and delivery of LogicLibrary's products, Carlson's responsibilities will now also include product management. LogicLibrary's closed-loop approach is the only solution that provides SOA governance throughout the entire service lifecycle, including architecture, design, production and consumption.

About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse software development assets. The company's patented technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner Inc.'s 2H05 to 1H06 Magic Quadrant for Metadata Repositories* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized for three consecutive years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse, BEA and Borland. LogicLibrary is headquartered in Pittsburgh, with an additional office in Rochester, MN. For more information, visit <http://www.logiclibrary.com>.
