**LOGICLIBRARY WINS AN INNOVATIVE TECHNOLOGY AWARD  
FROM IDG'S *COMPUTERWORLD***

*Leading Software Development Asset (SDA) Management Solution Recognized for Ability to Cut Costs, Reduce Waste and Increase Productivity*

**PITTSBURGH—September 20, 2004**—LogicLibrary®, the leading provider of software asset management tools, has won an Innovative Technology Award from IDG's *Computerworld*, the Voice of IT Management, for leading-edge technology that provides measurable business value to end-user organizations. Logidex™, LogicLibrary's flagship product, was recognized as one of the leading-edge technology products in the application development category. This honor is part of *Computerworld's* third annual Innovative Technology Awards program, which was announced in the September 13 issue and online at [www.computerworld.com](http://www.computerworld.com).

In order to be considered for the awards program, vendors had to be nominated by IT end users that do not produce or sell technology. Nominees were surveyed regarding their technology innovations and customer references were contacted for each vendor. A panel of outside experts and *Computerworld* editors then reviewed the surveys and chose 30 winners in 12 categories, including application development, data management, mobile/wireless, security and web site management.

"It is an honor to be recognized by *Computerworld*, one of the world's premier technology publications," said Greg Coticchia, CEO of LogicLibrary. "LogicLibrary has garnered a tremendous amount of industry recognition in 2004. We gain invaluable insight by working closely with our customers and partners. This enables us to provide the industry's most comprehensive and pioneering software asset management solution. LogicLibrary is the 'go-to' company for businesses committed to maximizing their software investments and new service-oriented projects."

Logidex is a collaborative software development asset (SDA) management solution that simplifies the creation, migration and integration of enterprise applications. It represents inherently complex, enterprise application environments in a graphical, intuitive way. Logidex is the only SDA management solution that offers federated library support, model-based searching, out-of-the-box assets, measurements and metrics—all within .NET and J2EE development environments.

“The winners of *Computerworld's* Innovative Technology Awards exemplify today’s most creative and original technology thought leaders,” said Don Tennant, editor in chief of *Computerworld*. “They should be congratulated for their ability to develop products that create new advantages and opportunities for both current and prospective Fortune 1000 customers.”

To view the complete list of the Innovative Technology Awards winners and read details of customer implementations of their products, please visit <http://www.computerworld.com/managementtopics/management/report>.

### **About *Computerworld***

*Computerworld*, the Voice of IT Management, is the most trusted source for critical information needs of senior IT management. *Computerworld's* integrated offerings form the U.S.-based hub of the world’s largest (58-edition) global IT media network through its weekly publication, Computerworld.com website, focused conference series and custom research. In the past five years alone *Computerworld* has won more than 100 print and online awards for editorial and design excellence, surpassing its direct competition by an order of magnitude. Recognition includes the 2004 Magazine of the Year Award from the American Society of Business Publication Editors and a Jesse H. Neal Award for Best News Coverage. In print since 1967, *Computerworld* is the source for information technology management with a guaranteed rate base of 180,000, a total print audience of 1,869,000 (IntelliQuest CIMS v.10.0), and an online audience of over one million unique monthly visitors (DoubleClick).

*Computerworld* is a business unit of International Data Group (IDG), the world's leading technology media, research and event company. A privately-held company, IDG publishes more than 300 magazines and newspapers including *Bio-IT World*, *CIO*, *CSO*, *Computerworld*, *GamePro*, *InfoWorld*, *Network World*, and *PC World*. The company features the largest network of technology-specific Web sites with more than 400 around the world. IDG is also a leading producer of more than 170 computer-related events worldwide including LinuxWorld Conference & Expo, Macworld Conference & Expo, DEMO, and IDC Directions. IDC provides global market research and advice through offices in 50 countries. Company information is available at <http://www.idg.com>.

### **About LogicLibrary**

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse software development assets (SDAs). The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives. LogicLibrary has been positioned in the "Leader" quadrant in Gartner Inc.'s Magic Quadrant for Metadata Repositories, 2004 and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past two years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM/Rational, Eclipse and

Borland. For more information, visit [www.logiclibrary.com](http://www.logiclibrary.com).
