LOGICLIBRARY INTRODUCES ADD-IN FOR BORLAND JBUILDER

Tight Integration with the Industry's Premier Development Environments Gives LogicLibrary Customers Unmatched Flexibility for Creating World-Class Business Applications

PITTSBURGH—May 31, 2005—LogicLibrary®, the leading provider of software development asset (SDA) management tools, today announced the availability of an add-in that allows customers to launch Logidex directly from Borland® JBuilder®. Tight integration between JBuilder and Logidex is designed to help developers and architects better control and manage their organization's software development assets, leading to streamlined projects, cost benefits and improved productivity.

JBuilder 2005 is Borland's industry-leading commercial Java™ integrated development environment (IDE) that speeds development of world-class business applications. JBuilder 2005 applications can be rapidly deployed to leading J2EE™ application servers, including BEA® WebLogic®, IBM® WebSphere®, Sybase® EAServer, JBoss®, and the integrated Borland Enterprise Server.

“Borland is committed to helping organizations meet business and technical objectives through the accelerated delivery of software at reduced cost and risk,” said Rob Cheng, director of product marketing at Borland Software. “By providing value-added capabilities to identify, track and manage software development assets, LogicLibrary can help JBuilder users work more productively as they build and deploy applications throughout the enterprise.”

Logidex is a collaborative SDA management solution that simplifies the creation, integration, governance and security of enterprise applications throughout the complete application lifecycle. Its powerful mapping and discovery engine gives businesses and government organizations the ability to identify, manage and control the design, development and consumption of services throughout the distributed enterprise. Logidex is the only software asset management product to feature tight integration with the industry's leading development environments, including JBuilder.

“By featuring tight integration with the industry's leading IDEs, LogicLibrary makes it possible for developers and architects to have total control of their development assets as they work in the environment of their choice,” said Alan Himler, vice president of product management and marketing at LogicLibrary. “Creating reliable, secure applications that will be reused many times in service-oriented architectures can be a difficult task. The combination of Borland and LogicLibrary solutions will save customers time and money, as they deliver exceptional applications.”

About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse software development assets (SDAs). The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives. Additionally, LogicLibrary's Logiscan provides powerful, easy-to-use code-scanning technology that helps architects, developers and IT professionals ensure the highest levels of security throughout the software development lifecycle.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner Inc.'s Magic Quadrant for Metadata Repositories, 2004* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past two years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with additional offices in Rochester, MN and Sunnyvale, CA. For more information, visit www.logiclibrary.com.
