LOGICLIBRARY ATTAINS MICROSOFT CERTIFIED PARTNER STATUS IN MICROSOFT PARTNER PROGRAM

Status Gives Visual Studio 2005 Team System Users Greater Access to Industry-leading SOA Governance Solution

PITTSBURGH—February 28, 2006—LogicLibrary®, the leader in SOA governance and software reuse, today announced that LogicLibrary has attained Microsoft Certified Partner status. Being a Microsoft Certified Partner will provide LogicLibrary with access to additional sales channels through Microsoft's partner network. This move further validates LogicLibrary's ability to be integrated seamlessly into Visual Studio 2005 Team System projects.

"Microsoft is excited that LogicLibrary has become a Microsoft Certified Partner," said Rodney Beverly, Business Development Manager for US ISV National Sales & Business Development, Microsoft Corp. "LogicLibrary's Logidex helps Visual Studio 2005 Team System customers manage, reuse and govern their software development assets in a more efficient and effective manner. LogicLibrary's level of commitment bodes well for our mutual and future customers."

LogicLibrary's flagship product, Logidex, is a design-time integrated registry/repository with configurable governance policies that makes it possible for organizations to actively track and manage services from design through deployment. Logidex's unique combination of a repository for services production, a registry for services and artifact consumption, and automated UDDI and ESB publication options provides governance capabilities for the entire service-oriented architecture (SOA) lifecycle.

"Being recognized as a Microsoft Certified Partner is the latest milestone in our relationship with Microsoft," said Greg Coticchia, CEO of LogicLibrary. "Logidex gives Visual Studio .NET users the governance and reuse capability necessary for all their enterprise initiatives. Organizations utilizing Visual Studio .NET tools and Logidex are able to produce world-class applications that deliver exceptional business value."

LogicLibrary has a long-standing relationship with Microsoft. In February 2005, LogicLibrary included Microsoft's patterns & practices application blocks, Enterprise Library, in Logidex giving .NET developers using Logidex easy access to the Enterprise Library for solving common enterprise development challenges. LogicLibrary is also a

Premier member of the Visual Studio Industry Partner (VSIP) program, and Logidex is hosted on MSDN (<http://lab.msdn.microsoft.com/logiclibrary>).

The Microsoft Partner Program was launched in October 2003 and represents Microsoft's ongoing commitment to the success of partners worldwide. The program offers a single, integrated partnering framework that recognizes partner expertise, rewards the total impact that partners have in the technology marketplace, and delivers more value to help partners' businesses be successful.

About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse SDAs. The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner Inc.'s 2H05 to 1H06 Magic Quadrant for Metadata Repositories* and engages with Microsoft as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past three years on the SD Times 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with an additional office in Rochester, MN. For more information, visit <http://www.logiclibrary.com>.
