LOGIDEX DEVELOPER TOOL DOWNLOADS SOAR

Downloads Double in Last Six Months, Totaling Nearly 5,000 as Design-time Registries and Repositories Become Core to SOA Initiatives

PITTSBURGH—April 26, 2006—LogicLibrary®, the leader in design-time SOA governance and software reuse, today announced that downloads of its Logidex Asset Viewer have doubled in the last six months. Downloads have reached a volume of nearly 5,000 across all properties where the Asset Viewer is available, including LogicLibrary's own Logidex Asset Center, CNET's download.com, and the Microsoft Developers Network (MSDN) site. This rapid increase indicates a strong demand for Logidex tools among architects and developers looking to simplify the creation, integration and governance of enterprise applications throughout the complete application lifecycle.

“The rise in Logidex downloads comes at a time when enterprises are ramping up SOA initiatives. A well-designed repository/registry is where everything comes together on the architectural/development side of SOA,” said Alan Himler, vice president of product management and marketing at LogicLibrary.

The Logidex Asset Viewer allows registered users to search the Logidex library to locate key software development assets (SDAs) and associated documentation, code snippets and other related information for viewing and downloading. The library provides access to Sun Microsystems' Java™ Platform, Enterprise Edition (J2EE) Core Patterns, Microsoft .NET-based best practices and assets, Microsoft Enterprise Library, and the Federal Enterprise Architecture (FEA) Reference Models and assets. By making these application blocks available, LogicLibrary is helping developers and architects more efficiently locate and deploy them to meet their technical and business needs.

Microsoft selected the Logidex .NET Library as the first third-party product to be hosted on MSDN three years ago, giving millions of developers and architects invaluable resources that are consistent, extensible and easy to use with Visual Studio. Today more than 40 percent of LogicLibrary's customers rely on the Microsoft development environment. Beginning July 24, the Logidex .NET library will be exclusively available on the Logidex Asset Center. Developers can locate and download assets in the development environment of their choice by visiting www.logidexassetcenter.com.

“Our longstanding partnership with Microsoft and presently MSDN has successfully seeded the marketplace with convenient, powerful tools to solve common enterprise development challenges, resulting in quicker production of high-quality applications and faster return-on-investment. Now we’ll move those resources to our own Asset Development Center to provide a single resource for organizations that almost always leverage a combination of .NET, Java, Eclipse and other popular programming languages,” added Himler.

The Logidex Asset Viewer is currently available for download at the following URLs:

About Logidex

The most widely-used metadata repository for software development assets (SDAs), Logidex features integrated registry/repository functionality and configurable governance policies that make it possible for organizations to actively track and manage services throughout their lifecycle. Featuring tight integration with the industry’s leading development environments, Logidex simplifies the creation, integration and governance of enterprise applications throughout the complete application lifecycle. Its powerful mapping and discovery engine gives businesses and government organizations the ability to identify, manage and control the design, development and consumption of services throughout the distributed enterprise.

About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse SDAs. The company’s patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives.

LogicLibrary has been positioned in the “Leader” quadrant in Gartner Inc.’s 2H05 to 1H06 Magic Quadrant for Metadata Repositories* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past three years on the SD Times 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with an additional office in Rochester, MN. For more information, visit <http://www.logiclibrary.com>.
