LOGICLIBRARY CO-FOUNDER TO PRESENT ON SOFTWARE REUSE AT MARCH MICROSOFT PATTERNS AND PRACTICES SUMMIT

*Event to Highlight Best Practices for Using Enterprise Library Application Blocks and
Enterprise Solution Patterns*

PITTSBURGH—March 8, 2005—LogicLibrary®, the leading provider of software development asset management tools, today announced that Brent Carlson, vice president of technology and co-founder, will be a featured speaker at the Microsoft Patterns and Practices Summit on Monday, March 14, 2005 at Microsoft's Silicon Valley campus in Mountain View, California. The 4:30 p.m. PT presentation, titled "Software Reuse Best Practices," will examine real-world software reuse initiatives and the best practices that make them successful.

What: Presentation: "Software Reuse Best Practices"
Event: Microsoft Patterns and Practices Summit
Who: Brent Carlson, vice president of technology and co-founder
When: Monday, March 14, 2005; 4:30 p.m. PT
Where: Microsoft Silicon Valley Campus; Mountain View, CA

In the last 20 years, several approaches to designing and constructing reusable software components and modules have been created, but the goal of successful software reuse has remained elusive. With .NET and its robust component architecture, along with support from Microsoft's patterns & practices Group in the form of reusable Enterprise Library application blocks and Enterprise Solution Patterns, now available, enterprises are beginning to revisit the topic of reuse. This presentation will provide attendees with a better understanding of concepts and best practices for software asset reuse through an interactive discussion of tools, metrics and support available for reuse initiatives today. Attendees will be offered real-world examples of companies that are leveraging reusable assets.

LogicLibrary will be sponsoring a special evening reception and tour for Summit attendees Tuesday, March 15th from 5:30 p.m. – 8:30 p.m. at the new Computer History Museum in Mountain View. Attendees of the reception will have a unique opportunity to meet with Summit speakers and members of Microsoft's architecture teams.

Brent Carlson, vice president of technology and co-founder of LogicLibrary, drives the development and delivery of LogicLibrary's products. He is a 17-year veteran of IBM, where he served as lead architect for the WebSphere Business Components project and held numerous leadership roles on the "IBM San Francisco Project." He is the co-author of two books: *San Francisco Design Patterns: Blueprints for Business Software* (with James Carey and Tim Graser) and *Framework Process Patterns: Lessons Learned Developing Application Frameworks* (with James Carey). Carlson is also a frequent presenter at industry conferences, including Software Architecture Summit 2005, Web Services EDGE 2005, Enterprise Architect Summit 2004, Java Pro Live! 2004, Microsoft Tech-Ed 2004, Microsoft PDC 2003, IBM Rational Software Development User Conference 2004, regional user groups and Microsoft Architect Council meetings. He is a BEA Regional Director and was named to *InfoWorld's* 2004 list of CTOs to watch. Carlson holds 16 software patents, with eight more currently under evaluation.

About LogicLibrary

LogicLibrary is a leading provider of software and services that make it possible for enterprises to manage and reuse software development assets (SDAs). The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives. Additionally, LogicLibrary's BugScan provides powerful, easy-to-use application-scanning technology that helps architects and developers ensure the highest levels of security at the onset of the design and development process.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner, Inc.'s Magic Quadrant for Metadata Repositories, 2004* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past two years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM/Rational, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with additional offices in Rochester, MN and Sunnyvale, CA. For more information, visit www.logiclibrary.com.
