LOGICLIBRARY RECEIVES UNIQUE ASSET CAPTURE AND MANAGEMENT PATENT

Latest Patent Award Gives LogicLibrary Customers an Easy-to-Use Tool for Reuse and Governance of Software Development Assets

PITTSBURGH—August 2, 2006—LogicLibrary®, the leader in design-time service-oriented architecture (SOA) governance and software reuse, today announced it has been awarded patent 7080355 from the U.S. Patent and Trademark Office for the Company’s targeted asset capture, identification, and management invention. Two major highlights of this patent are the graphical reference model-based searching capability and the advanced method for tracking the usage of individual assets in different projects. Both are key components in LogicLibrary’s flagship product, Logidex, giving customers an unrivaled solution that provides both visibility for reusing software assets and governance of SOA initiatives.

Logidex is a design-time repository/registry with configurable governance policies that make it possible for organizations to actively track and manage services from design through deployment. The patented, targeted asset capture system within Logidex was invented by LogicLibrary’s Brent Carlson, Tim Graser, Debra Mariner, John Palof and Paul Tamminga. It maps software resources, such as software components, services and applications, to domain models and provides search and management tools for retrieving asset information and controlling asset acquisition. Logidex users simply submit an asset acquisition request for a specific development project. Logidex then ensures that requested assets are associated with approved projects and are properly registered.

“LogicLibrary’s patented technology helps customers meet two of today’s top corporate IT challenges— efficient use of enterprise assets and the ability to satisfy increasingly stringent compliance requirements,” said Brent Carlson, vice president of technology at LogicLibrary and patent co-author. “The growth of distributed and service-oriented computing has led to an exponential increase in the number of software objects an enterprise must manage, making reuse and governance more difficult than ever. LogicLibrary, however, makes it possible for both business users and programmers to collaboratively participate in managing available resources. This improved system for managing software resources results in tremendous savings, faster time-to-market and strict adherence to business policies.”

Logidex's unique combination of a repository for services production, a registry for services and artifact consumption, and automated UDDI and ESB publication options provides governance capabilities for the entire SOA lifecycle. Logidex is the only design-time governance product to feature tight integration with the industry's major development environments, including Eclipse, IBM WebSphere Studio, IBM Rational Application Developer, Software Modeler and Software Architect, Microsoft Visual Studio .NET, BEA Workshop Studio, Borland JBuilder and SAP NetWeaver Developer Studio.

About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse SDAs. The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner Inc.'s 2H05 to 1H06 Magic Quadrant for Metadata Repositories* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized for three consecutive years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse, BEA and Borland. LogicLibrary is headquartered in Pittsburgh, with an additional office in Rochester, MN. For more information, visit <http://www.logiclibrary.com>.
