LOGICLIBRARY PODCAST SERIES DEMYSTIFIES SOA GOVERNANCE

*Industry Experts Examine Governance, ROI for Software Reuse and the Pivotal Role
Played by Metadata Repositories in Successful SOAs*

PITTSBURGH—September 28, 2005—LogicLibrary®, the leading provider of software development asset management tools, today announced a podcast series, titled “Demystifying SOA Governance.” Featuring insight and commentary from a panel of renowned industry experts, this series includes valuable information for managing service oriented architectures (SOAs) and advice on how to measure the effectiveness of an SOA.

Who: Brent Carlson, vice president of technology and co-founder, LogicLibrary
Eric Marks, president and CEO of AgilePath Corporation
Dr. Jeffrey Poulin, systems architect, Lockheed Martin Systems Integration

What: “Demystifying SOA Governance”

Where: <http://www.logiclibrary.com/resources/podcast/>.

“SOAs are here to stay. But as organizations plan and build new architectures, there are a few common issues that arise,” said Brent Carlson, vice president of technology at LogicLibrary. “This series provides answers to the three most often asked questions regarding SOAs—how to measure the value of software reuse; the role of a repository in SOA definition, development and deployment; and what the best steps are for active governance of an SOA.”

Brent Carlson was named to *InfoWorld*’s prestigious ranking of the Top 25 CTOs in business for 2005. He is a frequent presenter at industry conferences and the co-author of two books: “SanFrancisco Design Patterns: Blueprints for Business Software;” and “Framework Process Patterns: Lessons Learned Developing Application Frameworks.” Carlson holds 16 software patents, with eight more currently under evaluation.

Eric Marks is a well known industry expert on SOA and Web Services. His company, AgilePath Corporation, focuses on the business aspects of SOA by targeting business and IT executives with its SOA strategy, architecture and implementation services. Marks is a frequent speaker and author on various information technology topics. His forthcoming book, “Executive's Guide to SOA,” will be published in March 2006 by John Wiley & Sons.

Dr. Jeffrey Poulin's landmark work on the business case for software reuse forms the basis for the reuse measurements and return on investment (ROI) models used by industry and government organizations worldwide. In addition, he has authored over 70 technical publications, including "Measuring Software Reuse: Principles, Practices, and Economic Models," a book published by Addison-Wesley.

About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse SDAs. The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner Inc.'s 2H05 to 1H06 Magic Quadrant for Metadata Repositories* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past three years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with additional offices in Rochester, MN and Sunnyvale, CA. For more information, visit <http://www.logiclibrary.com>.
