LOGICLIBRARY MARKET MOMENTUM CONTINUES TO GAIN STRENGTH

Explosive 206% Year-over-year Growth Highlights Strong First Quarter for SOA Governance Leader

PITTSBURGH—May 8, 2006—LogicLibrary®, the leader in design-time service-oriented architecture (SOA) governance and software reuse, today announced record results for the start of 2006. Highlighted by a 206 percent year-over-year growth rate, impressive customer wins, new integration partnerships and widespread industry validation, LogicLibrary has reached a new level of market awareness and success.

“When it comes to SOAs, the ‘tire-kicking’ phase is over. Organizations are aggressively moving toward becoming service-oriented businesses and they realize that to do it properly they need to effectively manage their resources right from the start. That is ideal for us,” said Greg Coticchia, CEO of LogicLibrary. “Since our founding in 2000, LogicLibrary has consistently set industry standards for helping organizations manage and reuse their software assets. The market is clearly recognizing the crucial business value that LogicLibrary delivers. We will continue to work tirelessly in the months ahead to solidify our position as the industry leader for design-time governance.”

LogicLibrary’s recent milestones include:

- A rapidly expanding customer list and close interaction with existing customers. For example, Global 1000 customers such as ING, Liberty Mutual and Wyeth participated in a March event examining the challenges and successes in building SOAs.
- An independent case study published by Nucleus Research in April that recognized LogicLibrary for the return-on-investment (ROI) delivered to its customers. In one case, a Logidex customer recorded an impressive 264 percent ROI in less than six months.
- Blue Titan Software, TopCoder and Metallec were among the companies that joined LogicLibrary in promoting end-to-end governance for the software development lifecycle.
- LogicLibrary was selected as an Inner City 100 “Company to Watch” for demonstrating extraordinary growth and for employing innovative business practices in an inner city environment.

- LogicLibrary continued to add support for a variety of products, including the widely-used open source Eclipse Business Intelligence and Reporting Toolkit (BIRT), BEA Workshop Studio 3.0 and Compuware OptimalJ.
- LogicLibrary's Logidex received its second "Ready for IBM Rational Software" validation.
- LogicLibrary attained Microsoft Certified Partner Status, giving Visual Studio 2005 Team System users greater access to Logidex and providing LogicLibrary with access to additional sales channels through Microsoft's partner network.

LogicLibrary's flagship product, Logidex, is a design-time integrated registry/repository with configurable governance policies that help make it possible for organizations to actively track and manage services from design through deployment. Logidex's unique combination of a repository for services production, a registry for services and artifact consumption, and automated UDDI and ESB publication options is designed to provide governance capabilities for the entire SOA lifecycle.

About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse SDAs. The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner Inc.'s 2H05 to 1H06 Magic Quadrant for Metadata Repositories* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past three years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse, BEA and Borland. LogicLibrary is headquartered in Pittsburgh, with an additional office in Rochester, MN. For more information, visit <http://www.logiclibrary.com>.
