2005 A RECORD-SETTING YEAR FOR LOGICLIBRARY

SOA Governance Leader Poised for Continued Success in 2006

PITTSBURGH—December 19, 2005—LogicLibrary®, the leading provider of software development asset (SDA) management tools, today announced its leading achievements for 2005.

“By all measures, 2005 has been an exceptional year for LogicLibrary,” said Greg Coticchia, CEO of LogicLibrary. “Tremendous customer growth, widespread industry recognition, impressive awards and new technology advances made this our most successful year. Organizations have realized that governance is essential to the long-term success of SOA projects. As we build on our reputation both for technological excellence and delivering impressive business value, LogicLibrary is poised for even greater success in the year ahead.”

LogicLibrary milestones in 2005:

1) Strong Customer Demand—With a proven track record for delivering business results, LogicLibrary’s customer base more than doubled in 2005. An August 11 *Investor’s Business Daily* feature on LogicLibrary reported “Big companies like MetLife and Highmark are already saving millions by reusing old software and rejigging it for other tasks... Clients such as Northwest Airlines and IBM like LogicLibrary because they don’t have to inventory all the software they have.”

2) Expanded Partnerships with IBM and Microsoft—Logidex became one of the first products certified as “Ready for IBM Rational Software.” Meanwhile, Microsoft’s Enterprise Library was added to the Logidex registry/repository and a Visual Studio Add-in was released that allows users to launch Logidex directly from Microsoft Visual Studio 2005 Team Foundation Server.

3) Product Excellence—TechTarget's SearchWebServices.com named Logidex the Application Development/Deployment “Product of the Year” and the *CRN* Test Center gave Logidex its highly-coveted “recommended” status.

4) Vision—Co-founder Brent Carlson was named as one of the Top 25 CTOs for 2005 by *InfoWorld* Media Group. This award honors IT executives who have demonstrated exceptional innovation and leadership within their organization as well as in the industry.

5) Industry Leadership—*SD Times* named LogicLibrary to its annual *SD Times* 100 for the third consecutive year. LogicLibrary was among a select group of companies to be recognized for three straight years, joining ranks with industry leaders such as IBM, Microsoft, BEA and Borland.

6) Additional Analyst Praise—Gartner, Inc. placed LogicLibrary in its “Leader” quadrant for the second straight year; Forrester Research recognized LogicLibrary as a leader among the new generation of solutions that support enterprise reuse of software development assets; and ZapThink, LLC said Logidex improves efficiency and reuse of assets across an organization.

7) Technology Innovation—LogicLibrary expanded on its ground-breaking Smart Controls™ technology with the introduction of Asset Relationship Visualization (ARV). ARV enables organizations to understand how IT development projects relate to and support business processes.

8) Standards Leadership—LogicLibrary became a member of OASIS, the Organization for the Advancement of Structured Information Standards. Brent Carlson, LogicLibrary’s co-founder and vice president of technology, serves on the OASIS SOA Adoption Blueprints Technical Committee.

9) Growing Partnerships—In addition to new strategic partnerships with leading companies such as Blue Titan, MetaMatrix, TopCoder, Unicorn Software and Metallett, LogicLibrary announced its first value-added reseller (VAR) in the United Kingdom, Capacity & Performance Solutions Ltd. (CPSL).

10) Recognition—Pennsylvania Governor Edward G. Rendell presented a state economic development grant to LogicLibrary CEO Greg Coticchia and Birchmere Ventures Partner Chuck Dietrick at a ceremony in Pittsburgh.

About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse SDAs. The company’s patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives.

LogicLibrary has been positioned in the “Leader” quadrant in Gartner Inc.’s 2H05 to 1H06 Magic Quadrant for Metadata Repositories* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been

recognized the past three years on the SD Times 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with an additional office in Rochester, MN. For more information, visit <http://www.logiclibrary.com>.
