**LOGICLIBRARY RECOGNIZED BY BZ MEDIA'S *SD TIMES*
IN THIRD ANNUAL *SD TIMES* 100**

*SOA Governance Platform Earns LogicLibrary Prestigious Award; Company Joins
Other Three-Time Winners Such as IBM, Microsoft and Borland*

PITTSBURGH—May 16, 2005—LogicLibrary®, the leading provider of software development asset (SDA) management tools, has been named to the annual *SD Times* 100 for the third consecutive year. The *SD Times* 100, published in the May 15, 2005 issue of *SD Times*, recognizes the leaders and innovators of the software development industry. Named to the prominent list every year since its inception in 2003, LogicLibrary was recognized in the “Components & Libraries” category for its comprehensive service-oriented architecture (SOA) governance platform and federated repository support.

“The software development industry is led by innovation,” said Alan Zeichick, editor-in-chief of BZ Media’s *SD Times*. “When choosing the 2005 *SD Times* 100, we carefully considered each organization’s products and services, reputation with development managers, and the new ideas and thought leadership that it has brought to the industry. Thanks to the *SD Times* 100 winners, the art of software development continues to advance at a rapid pace.”

LogicLibrary’s flagship product Logidex is a collaborative SDA management solution that simplifies the integration, reuse and governance of enterprise applications throughout the complete application lifecycle. Logidex is the only software development asset management product to feature tight integration with the industry’s leading development environments, giving developers freedom to work in the environment of their choice. Additionally, LogicLibrary’s Logiscan is an easy-to-use appliance that analyzes binary code for both in-house and commercial applications and patches, producing real-time information that improves application quality and ensures that secure software is deployed into a business or government organization.

“We are honored that *SD Times* has recognized our achievements for the third straight year and proud to be placed on such a renowned list of leaders and innovators,” said Greg Coticchia, CEO of LogicLibrary. “With the emergence of SOAs, it is more important than ever that organizations be able to properly manage, reuse and govern services in distributed environments. In this respect, LogicLibrary continues to set the standard by providing ‘out-of-the-box’ process validations and controls for managing and reusing valuable software development assets.”

About BZ Media's *SD Times*

BZ Media LLC (www.bzmedia.com) is a New York-based media company combining the best of print and Internet publishing with industry-leading technical conferences and expositions. BZ Media's *SD Times* (www.sdtimes.com) is the twice-monthly newspaper of record for the software development industry. *SD Times* reaches more than 55,000 subscribers in 131 countries.

About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse software development assets (SDAs). The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives. Additionally, LogicLibrary's Logiscan provides powerful, easy-to-use code-scanning technology that helps architects, developers and IT professionals ensure the highest levels of security throughout the software development lifecycle.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner, Inc.'s Magic Quadrant for Metadata Repositories, 2004* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past three years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with additional offices in Rochester, MN and Sunnyvale, CA. For more information, visit www.logiclibrary.com.
