**LOGICLIBRARY NAMED TO PRESTIGIOUS SOFTWARE MAGAZINE'S
ANNUAL SOFTWARE 500**

*Software Magazine Ranks LogicLibrary as one of the World's Largest
Software Companies*

PITTSBURGH –October 26, 2006 – LogicLibrary, a leader in design-time service-oriented architecture (SOA) governance and software reuse, today announced its inclusion on the Software 500, *Software Magazine's* list of the world's foremost software and services providers, published as an online catalog on www.Softwaremag.com.

LogicLibrary's Logidex™ is the industry's best-of-breed solution for managing services from architecture and design through deployment. Logidex is a configurable, design-time repository/registry that makes it possible for organizations to actively track and manage services from design through deployment. Logidex's unique combination of a repository for services production, a registry for services and artifact consumption, an automated UDDI, ESB, and soon WebSphere Service Registry and Repository publication options is designed to provide closed-loop governance capabilities for the entire SOA lifecycle.

"*Software Magazine's* recognition of our market success and revenue growth is a reflection of the commitment, dedication and vision of the entire LogicLibrary team," said Alan Himler, LogicLibrary CEO. "2005 was an exceptional year for LogicLibrary, tremendous customer growth, along with widespread industry recognition, and new technology advances made 2005 our most successful year. Enterprises have realized that design-time governance is essential to the long-term success of SOA projects."

"The 2006 Software 500 results show that growth in the software and services industry was flat from 2004 to 2005, the ranking year. The industry continues to be dynamic with more than 90 new companies on the list this year," says John P. Desmond, editor of Software Magazine and Softwaremag.com. "Strong segments this year included security and system integration services. While much of the growth is coming from outside the U.S. in the services segment, the flattening world effect is sending some of it back too. "Total employee head count is down from the previous year's Software 500, reversing a growth trend. The industry produced about the same revenue with fewer employees," Desmond says.

"The Software 500 helps CIOs, senior IT managers and IT staff research create the short list of business partners," Desmond says. "It is a quick reference of vendor viability. That is content of value." The Software 500 is a revenue-based ranking of the world's largest software and services suppliers targeting medium to large enterprises, their IT professionals, software developers and business managers involved in software and services purchasing. The ranking is based on total worldwide software and services revenue for 2005. This includes revenues from software licenses, maintenance and support, training and software-related services and consulting. Suppliers are not ranked on their total corporate revenue, since many have other lines of business, such as hardware. The financial information was

gathered by a survey prepared by King Content Co. and posted at www.Softwaremag.com, as well as from public documents.

About Digital Software Magazine, the Software Decision Journal, and Softwaremag.com

Digital Software Magazine, the Software Decision Journal, has been a brand name in the high-tech industry for nearly 30 years. Softwaremag.com, its Web counterpart, is the online catalog to enterprise software and the home of the Software 500 ranking of the world's largest software and services companies, now in its 24th year. Software Magazine and Softwaremag.com are owned and operated by King Content Co.

About King Content Co. and the Software Marketing Perspectives Conference & Expo

King Content Co., owner of Software Magazine, is holding the third annual Software Marketing Perspectives Conference & Expo at the Marriott Boston in Newton, Mass., May 23-25, 2007. A Call for Papers will be issued in October and will be open through the end of November. The SMP event brings together technology product managers, marketing communications and public relations professionals in a two-day conference program. Conference attendees aim to increase their personal success by learning from their peers and making connections. More information about the 2007 event will be coming soon.

About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse software development assets. The company's patented technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner Inc.'s 2H05 to 1H06 Magic Quadrant for Metadata Repositories and maintains strategic partnerships with Microsoft, as an Alliance member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized for three consecutive years on the SD Times 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse, BEA and Borland. LogicLibrary is headquartered in Pittsburgh, with an additional office in Rochester, MN. For more information, visit <http://www.logiclibrary.com>.
