LOGICLIBRARY'S LOGIDEX NAMED APPLICATION DEVELOPMENT "PRODUCT OF THE YEAR" BY SEARCHWEBSERVICES.COM

*Honor Recognizes "Must-Have Tools" for Developing, Integrating, Securing and
Managing Web Services Projects*

PITTSBURGH—January 18, 2005—LogicLibrary®, the leading provider of software asset management tools, today announced that TechTarget's SearchWebServices.com has named Logidex 3.5 the 2004 Application Development/Deployment "Product of the Year." Logidex beat out products from IBM and Novell to win the prestigious Gold Award. LogicLibrary enables businesses to manage, govern and secure software development assets (SDAs) used in service-oriented architectures (SOAs), Web services and other software development initiatives.

Presented annually by the editors of SearchWebServices.com, the Products of the Year Awards were judged by the SearchWebServices editorial staff in conjunction with a team of users, industry experts, analysts and consultants. Judges evaluated each product on a wide-ranging set of criteria and Logidex "earned high scores in each category, particularly in performance, ease of integration and support."

"The year 2004 was all about service-oriented architecture and the ability to reuse software components," said SearchWebServices.com Editor Catherine Ketcher. "It makes sense then that our winning product in the application development/deployment category is LogicLibrary, Inc.'s Logidex 3.5."

Logidex is a collaborative SDA management solution that simplifies the creation, migration and integration of enterprise applications throughout the complete application lifecycle, in both .NET and J2EE environments. It features tight integration with all major development environments, including Eclipse, IBM WebSphere Studio, IBM Rational XDE, Microsoft Visual Studio .NET and SAP NetWeaver. Additionally, LogicLibrary's BugScan application-scanning technology helps architects and developers ensure the highest levels of security at the onset of the design and development process.

"LogicLibrary was founded on the belief that application development does not have to be difficult or costly," said Greg Coticchia, CEO of LogicLibrary. "Our team works hard to continually evolve Logidex to meet the needs of our customers so that they may more easily embrace the promised benefits of application integration, Web services and SOA through the implementation of strategic management, reuse and governance programs. We

are honored that the industry experts at SearchWebServices.com have recognized Logidex as the Application Development ‘Product of the Year.’”
