## LOGICLIBRARY'S LOGIDEX™ IS RECOGNIZED FOR ITS SOA CAPABILITIES

**PITTSBURGH—August 29, 2006**—A new, independent report from industry analyst company The 451 Group acknowledges LogicLibrary, the leader in design-time service-oriented architecture (SOA) governance and software reuse, and its flagship product – Logidex - for its SOA capabilities. In the report, Logidex is highlighted as discovering and mapping software development assets – components, services, frameworks, documentation, models and plans – in order to represent them in an intuitive and graphical way. The result is a library of software that encourages reuse.

"Everyone agrees that software reuse would be a wonderful thing, but no one is entirely sure how to go about it," said Rachel Chalmers, Senior Analyst with The 451 Group, a technology industry analyst company focused on the business of enterprise IT innovation, in her report. Chalmers added, "You certainly can't get there without finding, categorizing and storing the assets you already have, so the Logidex approach is a very good start." *This comment appeared in an independent report, titled "LogicLibrary claims its SOA capabilities contribute to strong revenue growth," which was published on August 17 of this year (see Editor's Note below).*

"In order for SOAs to realize their intended business objectives—improved agility and reduced IT cost—organizations must always be in control of the services that are created, and then used and re-used," said LogicLibrary CEO Greg Coticchia. "We are honored that the industry experts at The 451 Group have recognized Logidex for the unique value that it brings to an increasing global marketplace of SOA customers."

### **About Logidex**

Logidex is a collaborative SDA management solution that simplifies the creation, integration and governance of enterprise applications throughout the complete application lifecycle. Its powerful mapping and discovery engine gives businesses and government organizations the ability to identify, manage and control the design, development and consumption of services throughout the distributed enterprise.

### **About LogicLibrary**

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse SDAs. The company's patented technology provides a

comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives.

LogicLibrary has been positioned in the “Leader” quadrant in Gartner Inc.’s 2H05 to 1H06 Magic Quadrant for Metadata Repositories\* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized for three consecutive years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse, BEA and Borland. LogicLibrary is headquartered in Pittsburgh, with an additional office in Rochester, MN. For more information, visit <http://www.logiclibrary.com>.
