## **LOGICLIBRARY'S LOGIDEX RECEIVES VERSION 7 "READY FOR IBM RATIONAL SOFTWARE" VALIDATION**

*SOA Governance Leader Receives Third "Ready for IBM Rational Software" Validation*

### **ORLANDO—IBM Rational Software Development Conference 2006—June 6, 2006—**

LogicLibrary®, the leader in SOA governance and software reuse, today announced that the company's AnySource Asset Adapter has received IBM's "Ready for IBM Rational software" validation for IBM Rational® ClearCase® and IBM Rational® ClearQuest® Version 7 integration. This validation demonstrates that the adapter, which is an extension to LogicLibrary's flagship Logidex product, integrates according to IBM specifications, at the IBM Software Development Platform - Software Development Lifecycle and Process level of the program.

Logidex is a design-time repository/registry with configurable governance policies that make it possible for organizations to actively track and manage services from design through deployment. Logidex's unique combination of a repository for services production, a registry for services and artifact consumption, and automated UDDI and ESB publication options provides governance capabilities for the entire SOA lifecycle.

"The IBM Rational Application Development Platform and LogicLibrary help organizations ensure that services are properly aligned with business objectives," said Brent Carlson, vice president of technology and co-founder of LogicLibrary. "The configurable governance capabilities of Logidex Smart Controls allow businesses to actively manage services and enforce policies. Logidex also brings together the business, development and operation areas of an organization. This kind of support for business objectives is critical for success in today's on demand world."

LogicLibrary also features Logidex plug-ins for key products in the IBM Software Development Platform, including IBM Rational Application Developer, IBM Rational Software Architect and IBM Rational Software Modeler. The Logidex plug-ins for IBM can be accessed through the "Ready for IBM Rational software" Plug-in Central at <http://www-128.ibm.com/developerworks/websphere/downloads/plugin/>.

Carlson was a featured speaker at this week's IBM Rational Software Development Conference. His presentation, "How to Achieve Long-Term SOA Success Using IBM Rational® and IBM WebSphere®," examined the principles and tools that support development, deployment and governance of SOAs in the IBM Rational and IBM WebSphere development and server environments.

## About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse SDAs. The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner Inc.'s 2H05 to 1H06 Magic Quadrant for Metadata Repositories\* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized for three consecutive years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with an additional office in Rochester, MN. For more information, visit <http://www.logiclibrary.com>.
