### **ZAPTHINK PAPER CITES LOGICLIBRARY AS A KEY PLAYER IN SOA GOVERNANCE MARKET**

*Leading Research Firm Believes the Ability to Manage Metadata Forms “the Lifeblood of Every SOA Implementation”*

**PITTSBURGH—March 8, 2006**—LogicLibrary®, the leader in SOA governance and software reuse, is prominently featured in the latest research report from ZapThink LLC, the premier industry analyst firm focused on Service-oriented Architectures (SOAs), XML, and Web Services. The paper, titled “Making Sense of SOA Governance, Service Lifecycle Management, Registries & Repositories,” states that at the core of SOA governance is the registry/repository, and LogicLibrary is highlighted as one of the key vendors in this market.

“The lifeblood of every SOA implementation is the ability to manage metadata. It is crucial to the governance process,” said Jason Bloomberg, senior analyst, ZapThink LLC. “With its ability to manage assets and metadata throughout the service lifecycle, the integrated registry/repository is at the center of the SOA governance infrastructure. LogicLibrary has consistently been a leading innovator in developing technology that makes it possible for organizations to effectively manage assets and implement SOA governance solutions that meet business objectives.”

LogicLibrary’s flagship product, Logidex, is a design-time integrated registry/repository with configurable governance policies that makes it possible for organizations to actively track and manage services from design through deployment. Logidex’s unique combination of a repository for services production, a registry for services and artifact consumption, and automated UDDI and ESB publication options provides governance capabilities for the entire SOA lifecycle.

“Once again, ZapThink makes a valuable contribution to the industry’s understanding of the solutions that make SOAs possible,” said Greg Coticchia, CEO of LogicLibrary. “As organizations grow their SOA pilots into full-scale deployments, it is essential for them to have the ability to manage assets and enforce policies throughout the entire service lifecycle. Logidex is the only solution that makes it possible for customers to bring together their architecture, development and deployment efforts. Leading companies worldwide rely on LogicLibrary to govern their emerging SOA initiatives.”

## **About LogicLibrary**

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse SDAs. The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner Inc.'s 2H05 to 1H06 Magic Quadrant for Metadata Repositories\* and engages with Microsoft as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past three years on the SD Times 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with an additional office in Rochester, MN. For more information, visit <http://www.logiclibrary.com>.
