ZAPTHINK NAMES LOGICLIBRARY A THOUGHT LEADER

Analyst Firm Recognizes LogicLibrary for its Leadership in the Reuse, Management and Governance of SOAs

PITTSBURGH—October 17, 2005—LogicLibrary®, the leading provider of software development asset (SDA) management tools, today announced that it has been recognized as a “ZapThought Leader” by ZapThink LLC, the premier industry analyst firm focused on Service-oriented Architectures (SOAs), XML, and Web Services. LogicLibrary’s Logidex, the most widely used metadata repository for SDAs, makes it possible for organizations to govern the production process for reusable components, Web services and other development assets within an SOA.

“ZapThink believes that an incremental approach to SOA is a key best practice—start with small, manageable projects and maintain tight control right from the start,” says Jason Bloomberg, senior analyst, ZapThink LLC. “LogicLibrary gives organizations the necessary capability to actively find and manage services from an SOA’s inception through to full enterprise deployment. Active SOA Governance will help companies optimize development of services and realize the full business value of their SOA implementations.”

LogicLibrary is the only company that offers configurable governance policies for the active tracking of services. As companies align technical capabilities with business requirements, Logidex provides a necessary foundation for control over services, processes and requirements. Unique features such as Smart Controls, Asset Relationship Visualization and Federated Libraries give LogicLibrary customers unsurpassed capabilities for managing enterprise architectures and SOAs.

“Since our inception in 2000, LogicLibrary has delivered the most innovative solutions for effectively managing software development assets,” said Greg Coticchia, CEO of LogicLibrary. “As SOAs and Web Services become more common, businesses realize the urgent need to actively manage SDAs and the value of aligning those technical assets with business objectives. LogicLibrary makes this possible and gives enterprises the agility they need to respond quickly to market needs.”

About LogicLibrary

LogicLibrary is the leading provider of software and services that make it possible for enterprises to manage and reuse SDAs. The company's patent-pending technology provides a comprehensive and collaborative approach for creating, migrating and integrating enterprise applications for use in service-oriented architecture, Web services and other software development initiatives.

LogicLibrary has been positioned in the "Leader" quadrant in Gartner Inc.'s 2H05 to 1H06 Magic Quadrant for Metadata Repositories* and maintains strategic partnerships with Microsoft, as a Premier member of the Visual Studio Industry Partner (VSIP) program, IBM, as an Advanced PartnerWorld Partner, and Serena. LogicLibrary has been recognized the past three years on the *SD Times* 100 list of leaders and innovators in the software development industry and has integration partnerships that include Microsoft, IBM, Eclipse and Borland. LogicLibrary is headquartered in Pittsburgh, with an additional office in Rochester, MN. For more information, visit <http://www.logiclibrary.com>.
